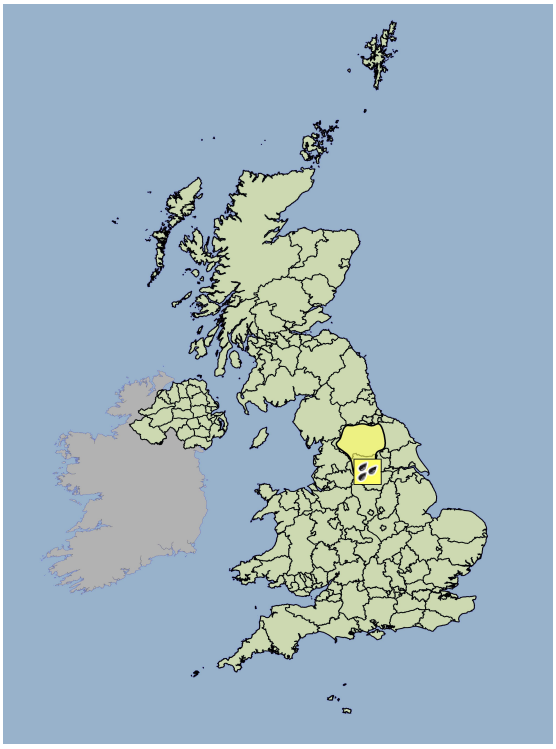
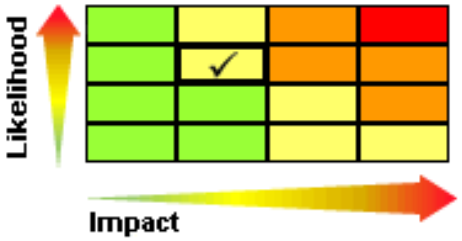
National Severe Weather Warning Service





CANCELLED

Chief Forecasters Assessment
An area of low pressure is expected to move east across southern Scotland on Sunday morning, the associated weather fronts bringing a spell of rain across northern England, that could be heavy at times. Amounts of rainfall are not expected to be excessive, (a further 15 to 25 mm falling in places, mainly over hills), however rivers remain high and are expected to respond to the forecast rainfall. Although the rain will ease during the early afternoon, it is expected that rivers may stay high for a few hours beyond this.

There remains some uncertainty in exact rainfall amounts and how rivers will respond, so further updates are possible.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **06:00 on Sun, 29th Nov 2015** until **14:00 on Sun, 29th Nov 2015**

Outbreaks of rain on Sunday morning and early afternoon are expected to be heavy at times. Although rainfall accumulations are not expected to be particularly large, rivers remain high from previous rainfall and are expected to respond, leading to the risk of flooding.

Please be aware of the possibility of some localised disruption.
